## SKILLS

### LANGUAGES

| JavaScript (ES6+), HTML, CSS

### FRAMEWORKS/LIBRARIES

| React.js, Material UI, Tailwind CSS

### TOOLS

| Git, Vite, npm, Postman

### BACKEND & DB

| Node.js, Express.js

### OTHER

| Google Maps API, Leaflet, REST APIs

# AVISEK DULAL

## ENTHUSIASTIC REACT.JS

Enthusiastic React.js developer with basic experience in creating user-friendly web apps. I've worked on projects that include maps, trip planners, and online shopping features using the MERN stack. I enjoy building clean and responsive designs, and I'm eager to learn more about building fast and reliable applications.

## PROJECT EXPERIENCE

### Travel Planner Web App

Tech Stack: React.js, Google Maps API, Node.js, MongoDB

- Developed an interactive trip planning tool allowing users to create trips, view locations on maps, and generate itineraries.
- Used @react-google-maps/api to show places like temples, museums, and parks within a 5km radius.
- Filtered POIs by categories (temples, waterparks, historical places) with custom markers.
- Integrated with a backend API to store and retrieve trip and user data.

## EDUCATION

Completed on 2076

**Science**

Vishwa Adarsha College | HSEB

Completed on 2082

**Bachelor of Engineering in Information Technology**

Everest Engineering College  
(Pokhara University)

## STRENGTHS

- UI/UX focused approach to front-end design
- Deep understanding of component-based architecture
- Problem-solving and debugging across React applications
- Self-motivated and continuously learning emerging technologies
